**To obtain a Parent Survey Data Analysis & SPP/APR Report from Avatar-International, send an e-mail indicating the report(s) you are interested in (Part B, Part C, or 619) to [Surveys@ImprovingSpecialEd.com](mailto:Surveys@ImprovingSpecialEd.com)**

*The base price of approximately \$5,000.00 (for Part B and 619) and \$2,500.00 (for Part C) includes an initial data quality assessment, a report of the measures in the NCSEAM metrics for each scale analyzed, and the percentage(s) reportable to OSEP on the relevant SPP/APR parent/family indicator(s). Unless otherwise specified, the percentage(s) reportable to OSEP will be calculated based on the NCSEAM recommended standards. The above price assumes that Avatar-International will be provided with a data file that meets specifications posted on the NCSEAM website. Supplementary analyses, for example, disaggregation of data by district, program, or other variables of interest, with separate reports of measures and percentages (assuming appropriate sample requirements) are available for an additional fee. Quotes for these and other services necessary to address individual states' data analysis requirements are available upon request. For more information, contact [Surveys@ImprovingSpecialEd.com](mailto:Surveys@ImprovingSpecialEd.com)*
